

**Use WiFi to connect
your remote site.
Just what you need.**

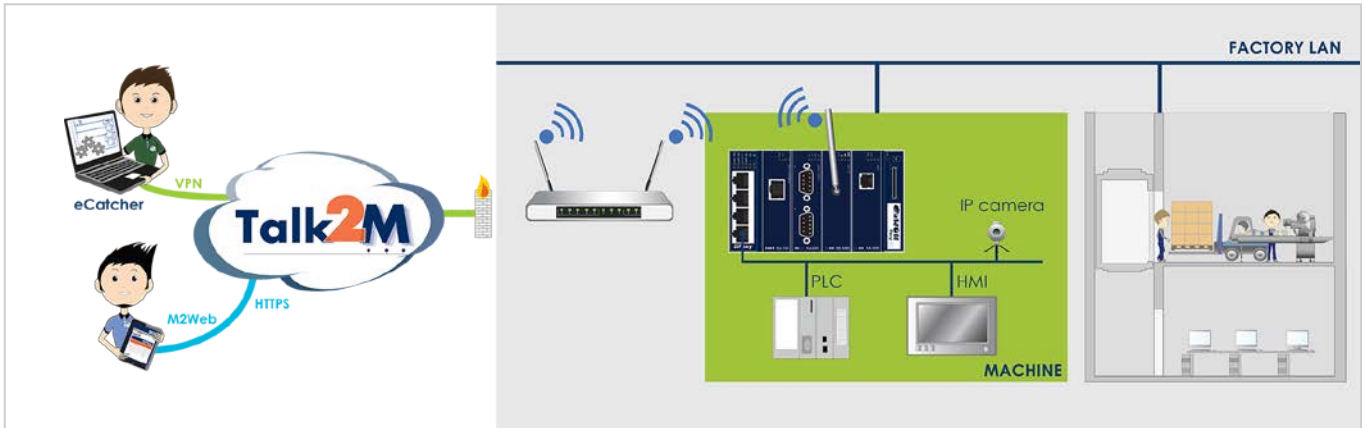

WiFi

**Industrial
M2M Router &
Data gateway**

802.11 b,g,n WiFi/WLAN client for remote connection

More and more WLAN(WiFi) access points are available in the industry. WLAN access points allow Internet connectivity while avoiding connection on the factory/corporate LAN network. The eWON Flexy WiFi extension card provides a powerful backup Internet access for industrial M2M applications. WLAN technology offers free access, high bandwidth, easy deployment (no cabling) and facilitates security network management.

Connect your Flexy to a Factory WiFi/WLAN access point

Technical characteristics:

802.11 Features	
IEEE versions	802.11 b/g/n Single stream
Security	WPA2, WPA and WEP
Radio	
Frequency	Channels: 1 to 11 (inclusive)
Hardware	
Operating temperature	-25 to +70°C
Certifications	
CE	<p>Conform to: EMC directive 2004/108/EC R&TTE Directive 1999/05/EC RoHS Directive 2001/65/EU REACH compliant</p> <p>According to standards : EMC emission class A; EN301489-1; EN301489-17 Spectrum: EN300328 Safety: EN60950; EN62311</p>
FCC	Conform to FCC part 15c
IC	Conform to Industry Canada RSS-210
Japan	MIC Japan certification
Safety	Comform to EN60950-1; UL60950-1; CSA-C22.2 N° 60950-1-07 UL certified (File number #E350576)

Ordering Ref.:

FLB3271

About Flexy:

The eWON Flexy is the first industrial modular M2M router and data gateway designed for OEMs and system integrators. The flexibility allows remote devices to be linked in an environment where communication technologies are constantly changing, and lets you communicate universally with the most varied field equipment, regardless of the protocol used.
