

Time for a new PanelView?

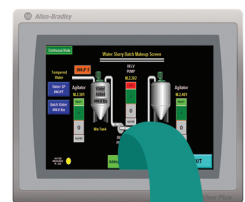

Try a Moxa Panel PC with FactoryTalk®

When it's time to migrate or upgrade your existing PanelView, consider using the power of software to your advantage. Simply install FactoryTalk View ME on a Moxa panel PC for an easy and cost-effective migration. You'll have a powerful, flexible platform with the freedom to adapt to changing requirements.

- ✓ Rugged hardware and environmental specs
- ✓ Port over existing MER files or modify as needed
- ✓ No need to upgrade existing PLCs or HMI designer
- ✓ No proprietary restrictions on running other software

Limited Time Offer!

Qualified PanelView users can get our HMI migration kit including a high quality Moxa panel PC for free. See reverse for details.

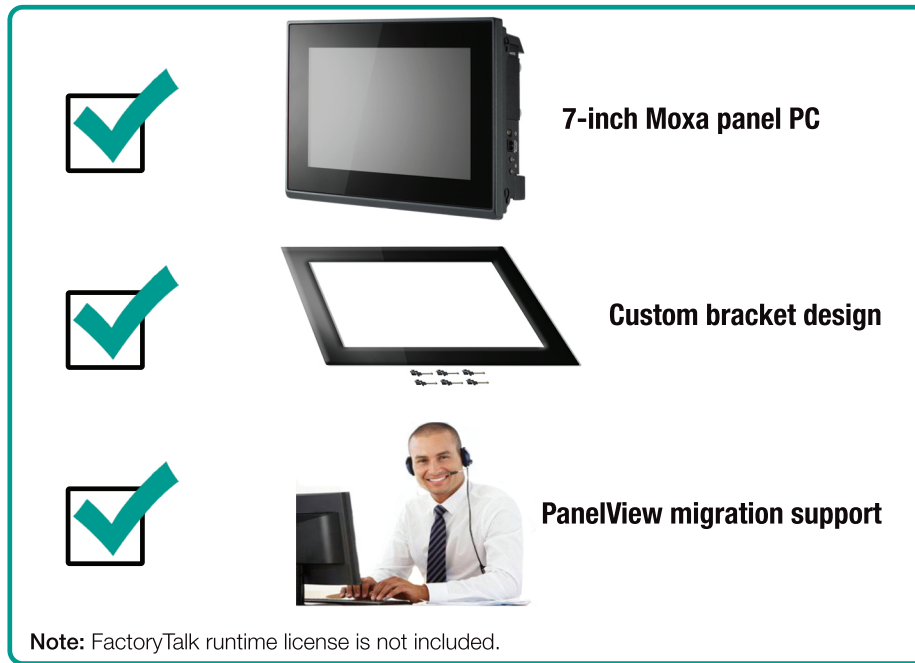

PanelView

Moxa Panel PC

Free HMI Migration Kit

Over \$1000 in Products and Services!

For a limited time, Moxa is offering this HMI migration kit to qualified PanelView users for absolutely free. This kit allows you to migrate your PanelView without reprogramming your HMI, replacing your PLCs, or upgrading your HMI design software. Just install the FactoryTalk runtime (not included) and PanelView migration is as easy as copying your MER file over to the panel PC.

This HMI migration kit includes a high-quality 7-inch Moxa panel PC that is yours to keep, no questions asked. There are no proprietary restrictions on the PC so there is no vendor lock-in. You can easily keep your existing PanelView screens and add new functionality with any software of your choice.

Act fast, because this offer is only good while supplies last or until March 31, 2020. Contact us today to see if you qualify!

How to Qualify

Provide the following information to your Moxa representative or to info.us@moxa.com to see if you qualify.
