

Customer Defined Bill Of Materials

With Quantum Automation's extensive network of world-class manufacturers and vendors, Quantum Automation can produce each kit, bag, box, assembly or any other type of exclusive packaging to meet customer specifications.

Quantum Automation provides a broad spectrum of kit & assembly services for any standard, stock/shelf, partially assembled, on-demand, or customized kits. Quantum Automation can assemble, select, package, and ship your control and networking solutions. Note: Minimum orders apply to private labeled products and kits.

Take advantage of Quantum Automation's fully integrated services to realize the most cost and time effective benefits.
