

Quantum Automation

Conflict Minerals Statement

In July 2010, the U.S. Government signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act). Section 1502 of the Dodd-Frank Act requires all US publicly traded companies to file disclosures and reports with the U.S. Securities and Exchange Commission related to the use of conflict minerals (tin, tantalum, tungsten and gold) in their products. More information on this topic is available at <http://www.sec.gov/news/press/2012/2012-163.htm>.

Quantum Automation expects our suppliers to establish policies, due diligence frameworks, and management systems that are designed to accomplish a supply of products to Quantum Automation that are DRC conflict free (do not contain metals derived from columbite-tantalite (tantalum), cassiterite (tin), gold, wolframite (tungsten), or their derivatives such that they directly or indirectly finance or benefit armed groups through mining or mineral trading in the Democratic Republic of Congo or an adjoining country).

Quantum Automation is not obligated to abide by this rule but we desire to support our customers that do request information to carry out compliance and due diligence activities.
